

SUIHARA

Capability Profile

Integrating mining supply chains to enhance
end-to-end performance

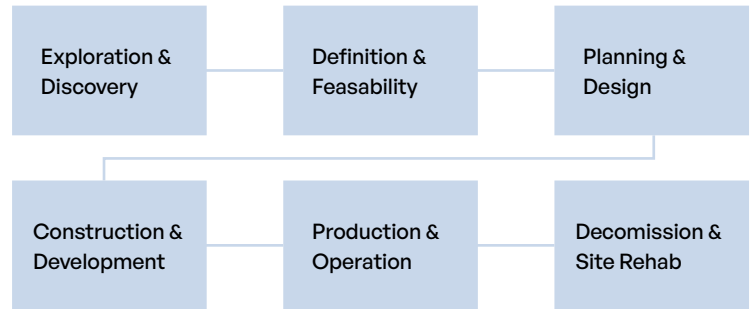

About Suhara

At Suhara we provide secure logistics networks from concept to completion.

Commencing operations in 1996, Suhara supports a broad mining client base developing specific supply chain architecture throughout the mine life cycle.

We deliver optimal logistics solutions for our customers delivering customised shipping, freight forwarding, customs clearance, warehousing, transport management, procurement services & technology.

Global connection

Our extensive local knowledge and global network of strategic partners in over 190 countries enables us to provide end-to-end supply chain solutions, backed up with leading edge technologies and assets, to support and enhance your business requirements.

Local content partner

In the countries that we operate, Suhara has approved local content plans, as required by the respective Local Content Regulations.

The local content plan covers:

- employment and training;
- research and development;
- technology transfer;
- legal services and
- financial services.

Expertise

International Freight Forwarding

We ensure your shipments are on-time, every-time. Our global freight forwarding network connects us to affiliated freight forwarding offices in 191 countries and 847 cities worldwide.

Our team of customs clearance brokers ensure peace of mind through expert local customs regulation know-how for clearance services at major transport gateways worldwide. From our headquarters in Dubai, UAE we provide complete international supply chain solutions from ex-works to final mile delivery.

Warehousing

Warehousing is an essential element of the supply chain for the procurement and distribution of your goods.

To meet the rising demand of cost-effective and dependable solutions for warehousing, we have established industry best practices to manage your inventories and ensure on-time deliveries, both locally and worldwide.

We offer multi-user and dedicated warehousing and distribution services that guarantee the highest level of proficiency to meet even your most challenging requirements and improve the performance of your supply chain - giving you peace of mind.

Transport Management

In association with our group fleet operator Primefuels, we offer dependable on-time door-to-door transport for both local and cross-border distribution. This includes 3PL and 4PL solutions.

- Order and customer management
- Planning and scheduling
- Route optimisation
- Client centric transport services
- Quality assurance
- IMO chemical services
- 40ft SOC availability
- Licensed transporter for:
 - Hazardous Cargo
 - ICMI certified
 - Food
